Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 9-12, drawn to winding material under a predetermine tension, classified in class 242, subclass 412.
- II. Claims 7-8 and 13-17, drawn to winding a web using guided blocks, classified in class 242, subclass 532.

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as winding a web without the use of supporting rollers or blocks. Invention II has separate utility such as in an apparatus which winds the web at a uniform tension. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).
